

EXPERIENCE

With over 35 years of service experience, we uphold the highest standards of quality and expertise.

Our comprehensive repair, refurbishment and maintenance services for rotating equipment ensure optimal performance.

As one of North America's leading non-OEM repair providers, we deliver trustworthy, reliable, and efficient solutions for all your rotary airlock repair need.

EMERGENCY SERVICE

Our unmatched Rotary Airlock Repair services are powered by our extensive parts inventory.

We service all major brands and provide the industry's best repair guarantee.

With 24/7 emergency service and free pickup and delivery, we understand that downtime isn't an option.

Our commitment is to get you back up and running with minimal delay.

At DMS, we maintain a comprehensive inventory of Rotary Airlock parts, including bearings, seals, gaskets, impellers, motors, and more all ready for immediate use in your repair.

COMMITMENT

Ensuring exceptional workmanship is our foremost priority.

We've established a continuous quality improvement program to enhance our service offerings.

Constantly refining our repair and rebuilding capabilities to meet client needs, we are committed to excellence in Rotary Airlock repairing and rebuilding.

DMS pledges to deliver unparalleled, fast, and reliable service to our clients, every single time.

SERVICE

DMS has earned an outstanding reputation by providing the highest quality of service in the Rotary Airlock Repair field, by offering our customers minimal downtime and quality service.

All impellers, casing and rotors are given a preliminary examination and evaluation which includes failure analysis, metallurgical testing, wear and deterioration analysis to determine the cause and extent of the damage and the course of correction as well as an estimated cost and time.
